

Apps to Download

Prior to your child's first day at Apple, please download the following apps:

Alta Open (formerly Open Path): Keyless Entry Front Door Access

This security system ensures that only authorized parents and guardians can gain access to our schools. You will be sent a link to activate your account. If someone other than a parent will be handling pick-up, please email or call your school with their information. All visitors will need to show identification.

ProCare Connect: Parent Communication

You can expect to receive updates on your child each day. The level of information you receive is dependent on the program your child is enrolled in. All families will receive photos and lessons via ProCare each week!

Watch Me Grow (optional): Live Camera Access

We are equipped with state-of-the-art surveillance cameras in our schools and on our grounds, monitored by school administration. Infant/Toddler/Preschool parents may access Watch Me Grow, our live video monitoring app. Please download the form in your school's information section within the Parent Portal, and follow the instructions. You will be given access to your child's main classroom during the school year. Please allow 24 hours once accepted to activate your access.

If you have trouble with any apps, your school's staff will be happy to help!
